

The department started M.Sc. in Chemistry program from July 2019. The MSc Chemistry program at IIT(BHU) aims to produce highly motivated scientific human resources for research and educational organizations. It is designed to inculcate in the student, knowledge, and in-depth understanding of the fundamentals of the subject. Thus, in the first two semesters, the focus will be on core Physical, Organic, and Inorganic courses. To develop innovative abilities and imbibe research methodologies, the students undertake projects/ dissertations through the 3<sup>rd</sup> and fourth semesters of the course. Concurrently, the students expand and explore their research interests through the study of a variety of electives in different areas of the subject.
